

Technical workshop – A training programme guaranteed to make you mobile. Ideal for technically interested tinkerers and practitioners!

Hobby screwdrivers take note: This qualification is fun and brings you a decisive step closer to your dream job! How does a road bike work and how do I upcycle a used bike? What does metalworking mean? How do you bend sheet metal? Anyone interested in bicycles, metal, cars and the technology behind them will find the “Technical workshop” qualification programme a good introduction to exciting professions in which metal and 2 or 4 wheels play the main role.

What do you personally gain from this?

This qualification will show you whether a technical job involving bicycles, mechanics and metalworking is really your thing. Not every bike enthusiast enjoys working in the bike workshop. With an understanding of the technical interrelationships often comes an enthusiasm for an exciting and varied occupational field related to mobility and metalworking.

How you can take part

Are you interested in this qualification? Speak directly to your job centre agent at the Verden Job Centre. If the programme suits you, your supervisor will register you for it directly and explain how to proceed. The “Technical workshop” qualification measure is suitable for the long-term unemployed and recipients of SGB II benefits as well as for refugees with access to the labour market.

Project time

Monday to Thursday 8.00 am to 4.00 pm, part-time roles are available.

Location

Hamburger Str. 56, parking spaces for cars and bicycles are available.

Your qualification as a participant

This qualification programme qualifies you to work in a metal or bicycle workshop. They actively lend a hand when bicycles are repaired, metal is welded or car tyres are changed.

As a participant you will receive ...

You will receive the following documents after completion of the course:

- 1 Certificate of attendance
- 2 Job reference
